

Electronic Supplementary Material 3:

Shape variation in the coxal bone

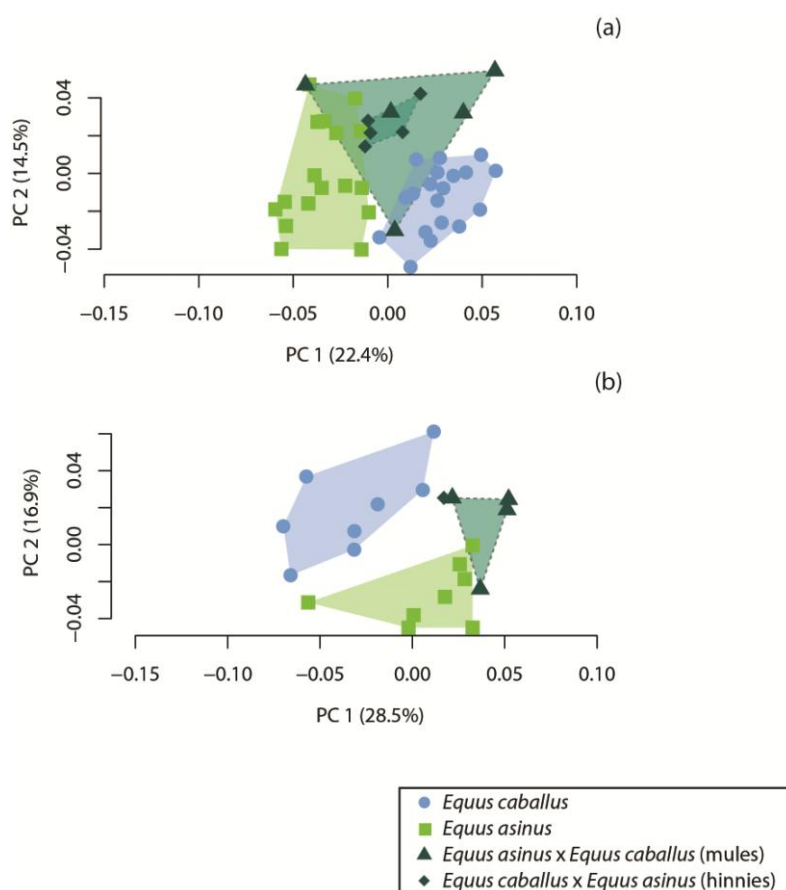

Figure: Scatter plot of the two first PCs of the PCA performed on the shape data of the coxal bone of females (a) and males (b).

	Transgression (%)	Closeness (%)
Females	68.4	-2.7
Males	113.6	12.2

Table: Percentage of transgression and closeness to parent species of hybrids, with positive values indicating greater closeness to donkey and negative ones to horse.
